

7th EDITION

THE GLOBAL BLOCKCHAIN CONGRESS

Celebrating DeFi and NFTs

June 21st & 22nd, 2021

Intercontinental Dubai
Festival City, UAE

Co-Hosted by

Title Sponsor

A WORD FROM OUR CEO

Hadi Malaeb

Co-Founder & CEO
Agora Group

Dear Delegates,

The world has started its slow crawl towards economic recovery. Or so we hope. As restrictions ease in many countries, we are still faced with uncertainties and new variants of Covid 19 appear to be challenging us and pushing the date of full recovery further.

Against this backdrop, Dubai has been a beacon in the fight towards regaining normalcy in our lives and has proven successful in fighting the spread of the virus through one of the best planned and executed vaccination campaigns in the world and a strict adherence to best practices to reduce the spread of the virus.

The 7th edition of the Global Blockchain Congress took place on June 21st and 22nd 2021 at the Intercontinental Hotel Festival City and was an outstand-

ing success with more than 300 attendees, 120 investors, 50 speakers, 25 sponsors, more than 300 pre-arranged and pre-scheduled one on one meetings, and many strategic and media partners. I want to thank each one of our partners for making this is the success it was.

The conference's Keynote Address was delivered by His Excellency Ahmed Bin Sulayem, the Executive Chairman and Chief Executive Officer of DMCC who spoke about how Dubai is planning to become a major hub for crypto and blockchain and discussed, in details, the various initiatives around this topic.

The conference theme was "Celebrating DeFi and NFTs" and was the first event in the MENA region to explore the challenges and opportunities of NFTs. We had an amazing lineup of speakers who delved into issues that matter in the industry:

- How has Covid 19 affected Investments in Blockchain Projects?
- Out of 101 investment opportunities presented to them, VCs only invest in one. How can companies

increase their chances in getting funded by VCs?

- How is Dubai becoming a major hub for crypto and blockchain?
- Building the bridge between DeFi and NFTs
- DeFi Evolution – from Vampire Attacks, Farming and APY Wars, to cross chain, oracles and security.

Leveraging its position as an international investment and trade hub, Dubai has been pushing hard into the disruptive technology sectors, including Blockchain. Recently, the Dubai Multi Commodity Centre started issuing licenses for crypto businesses to operate in Dubai with full legal rights. This has prompted many blockchain and crypto companies to open local branches in Dubai or to move their entire operation here. This week, the newly launched National Program for Coder, was announced under the directives of His Royal Highness Sheikh Mohamed Bin Rashid Al Maktoum, Vice President and Prime Minister of the UAE and Ruler of Dubai, with the aim of attracting 100,000 brilliant coders to Dubai. This initiative will surely add to Dubai's drive to becoming the city of the future and an international hub for blockchain. With access to funding, unparalleled infrastructure, a cosmopolitan population, a competitive talent pool, and a tax-free jurisdiction, Dubai IS the place to be for any crypto or blockchain company!

Our event aims to significantly contribute to the advancement of Blockchain technology in the Arab World by providing a unique platform that will connect regulators, Investors, business leaders, government officials and disruptors in a cutting edge conference agenda and via pre-arranged one-to-one meetings between investors and digital assets startups. This is the type of events where you get the most out of your participation by being pro-active, so it was lovely to see our sponsors and investors meet with as many people as they can, open as many discussions as possible and take full advantage of all the networking opportunities available for them.

Looking forward to seeing you again during our 8th edition of the Global Blockchain Congress on November 8th and 9th 2021 in Dubai, where we will be talking about renewable energy, sustainability and the role of blockchain in disrupting this sector by solving some of its main challenges and creating many new opportunities in the process.

Regards,

Gaurav Dubey

Founder & CEO

O1ex & TDeFi

Dear Readers,

In the middle of the pandemic, when the world was struggling to run businesses virtually, Dubai opened its arms for innovative ideas from the blockchain ecosystem. It gives me great pleasure to say that Agora Group and TDeFi team were able to execute an event at such a grand scale where ideas were brought to life.

I would like to thank the DTCM, the Ministry of health, venue, and the teams of both the organisations to pull the event following all the health and safety protocols. I would like to take this opportunity to thank all the participants - sponsors, investors, media firms, speakers and the guests to make the 7th edition of the Global Blockchain Congress, a huge success. Any amount of appreciation will not be able to make up for the efforts put up by our co-host of this event – Agora Group. This event welcomed 300 delegates, 120 investors, 50 speakers and 25 projects and it was

broadcasted live all over the world on leading media channels and a personalized Livestream on TradeDog' Youtube account.

In the middle of all the speculations, the innovative concept of an alternative form of currency - Crypto Assets have been able to mark its presence with institutions and large corporates accepting Bitcoin and other assets as a form of payment. While the world was struggling with negative yields and high hassles for borrowing, Decentralised Finance (DeFi) offered solutions for better yields and instant loans. As I write this message, the total value locked in the DeFi ecosystem has crossed \$40 billion but still the ecosystem is posed with multiple challenges which we tried to solve during this event.

- How to build the required trust to bring mass adoption to this ecosystem?
- What are the regulatory challenges that need to be addressed to bring this solution into the mainstream?
- What are the challenges a startup faces that is trying to build a solution and how can the participants of this ecosystem come together to solve these challenges?

- What steps are required to provide an international stage for disruptive crypto startups that can complement the traditional ecosystem and make it more transparent and efficient?

It was a driving thought that my team and I were obsessed with, and that led to the creation of TDeFi, a DeFi acceleration and mentorship program. Due to our foundational understanding of the corporate and enterprise ecosystem, and a primordial connection with the crypto industry, we decided to channel our expertise into excavating worthwhile DeFi and NFT startups and lead them to success through mutual sweat and blood.

We thank our event partner Agora Group for helping us build a powerful and industry-backed ecosystem for emerging startups at the Global DeFi Congress. Our sponsors, investors, business partners, mentors, and advisors really contributed to the success of this event to an immense degree.

The presence of leading personalities from the crypto industry and the government of the UAE depicted the weight of enthusiasm people have regarding this immensely capable financial sector. I am now anticipating to watch more valuable projects in the 8th edition of the Global Blockchain Congress scheduled on Nov 8th and 9th, 2021 in Dubai.

Daniel Santos

CEO
Woonkly

Dear attendees,

For the Woonkly team and for me personally, it has been an immense pleasure to participate as title sponsors of the 7th Edition of the Global Blockchain Congress: Celebrating DeFi and NFTs, organized by one of our strategic allies in MENA, Agora Group.

Since the irruption of Decentralized Finance and Non Fungible Tokens in the blockchain landscape, there has been a whirlwind of change and events that lead us to firmly believe that they are here to stay, that there is no turning back, and that there still is a long way to go.

During our meetings in Dubai with delegates, investors, speakers, and projects of the global blockchain ecosystem, there were countless questions and debates about DeFi and NFTs. But above all, we reflected on how the future of DeFi and NFTs should include certain regulations to fight current limitations such as lack of transparency, scams and anonymity.

At Woonkly, we believe that introducing regulated products to the ecosystem, such as the regulated AMM we launched during the Congress: defi.finance, will create new opportunities, invite new players such as institutional investors, and generate more confidence among users. That is why we embrace the Hybrid Finance "HyFi" market as the bridge between DeFi and traditional regulated financial institutions. From the Woonkly team, we would like to take this opportunity to thank the Agora Group and all of the attendees for their contribution to the blockchain landscape. We would also like to thank Dubai and its citizens for their warm welcome.

The diversity of players, events, investments, and projects converging in the city of Dubai are leading it to become the next global blockchain and crypto hub. At Woonkly, we are proud to be part of this productive ecosystem and look forward to creating new partnerships and successfully develop the ones we undertook during the Congress.

We leave with the certainty that we are building the future of finance together and that this will be huge and unstoppable.

Best regards,

Thanks to [Hadi Mulaeb](#), [Rim El Aridi](#) and the entire [AgoraGroup](#) for making possible the 7th Global Blockchain Congress in Dubai, UAE.

Hundreds of brilliant entrepreneurs and seasoned investors exchanged projects and experiences, all seeking to establish investment and commercial partnerships.

Lots of due diligence to come and the beginning of a handful lasting and profitable business relationships.

...and it's a wrap for The Global Blockchain Congress!!

Dated and honoured to be a part of the conversation around [#Crypto](#) and the way forward. 🚀

Crazy how [AgoraGroup](#), alongside [TDeFi](#), managed to put on such a confound show for all of us. 🤖

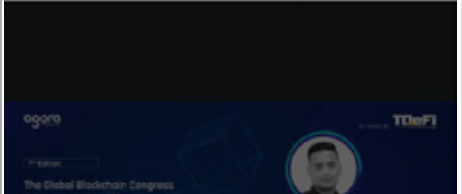

While sharing the stage with all the brilliant minds, it made us realize how the conversation is not about competing but about joining hands and working towards nurturing the crypto ecosystem. It's essential to educate the masses about the nuances around the ecosystem. 🤖

Congratulations to all the folks behind these impressive startups, [CoinFantasy](#), [Woosky](#), [Quantifoundation](#), [Vanilla Network](#), [QChain](#), [DRIE](#), [Goldfinger](#) - Members-Only Global Investment Club, TheDematerialised, and many others to making it through and providing a roadmap to the future of Crypto. 🚀

Watch us talk about [#DeFi](#) and Banking opportunities by clicking on the link <https://ind.in/en/ku55>.

Watch the full coverage of the event on [TradeDOG's](#) Youtube channel by clicking on: <https://ind.in/en/ku54>.

The 7th Global Blockchain Congress - Celebrating DeFi & NFT's have come and gone. But this event will go down in history as the event that ushered Vanilla Network and by extension it's new offspring "Sin City" and her flagship blockchain product the metaverse into the hearts of investors and key industry players.

On the 22nd of June, we unveiled the Sin City project in this auspicious event held in the heart of Dubai. In this project, we are going to build a metaverse - a virtual real estate with a gaming suite that empowers land owners to build urban real estate virtually. There will be the casinos, restaurants, high rise buildings, shopping malls, clubs, lounges as well as a door to the gaming suites that will be developed by Dutch Games based in Netherlands where gamers will focus on becoming the biggest kingpin in the high octane action thriller faced with bloody battles to control the Sin City underworld. The utility token **#VSN** will power all transactions in the platform.

Current partners for this project are the UK based 10t6, a blockchain tech incubator and accelerator, Matic non Polygon - a blockchain project powering galaxies & fast frictionless dapps/transactions on the Ethereum Network, Whitelit and the legendary DUTCH GAMES.

Users of metaverse will decide what they want to become, own real estate that they can sell for money with high returns or simply become gamers.

Details later...

Our Founder Saied Al Darmaki was in a fireside chat with Josef Holm of Draper Goren Holm at the Global Blockchain Congress. He believes that youth should get involved in the Defi ecosystem, and a user-friendly aspect of letting users access these technologies is very important for the whole ecosystem and overall infrastructure growth across UAE and Globally.

Moreover, we should educate people about these technologies and let them develop innovative solutions for the future.

Happy to have moderated a vivid panel on Defi and NFT at the Global Blockchain Congress in Dubai: <https://lnkd.in/g/uaGlyf>
We discussed e.g. the following topics :

- Is Decentralized finance a hype like ICO's, IEO's or other trends, or is it the future and for a long time?
- What about farming and institutional investors ?
- What is the future of NFT? Is Defi a good match for NFT (e.g. governance, farming and lending, tokenisation and secondary market) ?

Governance token : how to ensure a decentralized governance of NFT platforms ? For example, Rarible, a creator-centric NFT marketplace, decided to enrip a governance token called "RARI" and put up the steps to ensure that the platform is being regulated by a Decentralized Autonomous Organization (DAO).

Lending : will NFT collectibles and art become collaterals against Defi lending

Tokenisation :

With all the hype that the NFT market is getting these days, many consumers would want to get into the market and make money by buying into profitable NFTs. However, with every headline emphasizing the millions that NFTs are being sold for, it can seem inaccessible to the everyday person. Some project allow users to buy fractions in ownership of NFTs as opposed to buying one outright.

Music industry : NFT's will play a crucial role in proving right ownership and royalty payment, in a decentralized environment. See www.copyrightcoins.com
#crypto #cryptocurrency #fintech #defi #nft #music

Thanks to the excellent panelists : Hubertus Thonhauser Sergei Khitrov Anna Tutova Firdosh Shaikh

TESTIMONIALS

When we participated in the 1st edition of the Global Blockchain Congress, we were able to secure funding and partnerships that allowed us to get to where we are today.

To all the Blockchain projects, whether in the early or advanced stages, we assure you that the Global Blockchain Congress experience is unlike any other summit. This Congress is an exclusive, closed-door opportunity to connect with the greatest investors from the MENA region.

Daniel Santos, Woonkly - CEO

I really enjoyed the Agora blockchain conference. A great format with interesting speakers and one on one meetings with startups. It was good to meet people in person again and share our ideas. The quality of the presentations was excellent and we met again some interesting startups with whom we have follow up discussions. The format is very effective and allows us to have exposure to great startups in a couple of days what otherwise would have taken months.

Jack Smies, IOP Capital - Executive Director

The 7th Global Blockchain Congress was a delightful event with its exclusive content, diverse speakers and international participants. My primary goal was to meet and mingle with experts, professionals and investors in Crypto, DeFi and Blockchain industries. I found what I was looking for, if not even more. The event exceeded my expectations in multiple accounts. A very well-done conference with seamless organization.

Niyazi Yilmaz, Bitay - CEO & Founder

The 7th edition of the Global Blockchain Congress – Celebrating DeFi & NFTs was one of its kind and much required event for businesses to flourish in these times when the world is going through difficult times. Mass DeFi team had some great discussions with investors and the leaders of the Blockchain ecosystem. Thanks to Agora Group and TDeFi for putting up such a great event.

Rishabh, Mass DeFi - Founder & CEO

The Global Blockchain Congress by Agora is a powerful platform for connecting thought leaders, investors, and innovators in the world of blockchain. It enables collaboration within the emerging blockchain space, allowing exploration of ideas and opportunities as we venture towards a more digital future. It's a highly recommended space for learning, growing, and networking with the people who can shape tomorrow, and an honour to be a part of such a momentous event.

Thomas Stray, Endemaj Funds - CEO

We have been Investing in Crypto Ventures for years now including participating in unique and well-known projects right from their seed days. What Agora does is provide a trust-worthy platform for funds like us to engage with the choicest of projects and get an early access to either partner with them, or, participate in their funding rounds. More importantly, they bring "trust" to this process, which is a crucial factor. Looking forward to participating in more such events in the future.

Ganeshram Gunalan, Darq.Capital - Co-Founder

TESTIMONIALS

Agora was everything and more than I expected. We had the chance to meet some incredibly well-respected individuals of the blockchain investment communities. The event was organized to the T, well-structured and we'll be coming out again soon!

Jamie Thomson, Vulcan Forged - CEO

Ideaology is working with Agora for almost a year now, and their events always provide us visibility and partnerships we need to grow our project. It was awesome to be back to live events after all those online events last year!

Amar Kovacevic, Ideaology - CTO

The 7th edition of the Global Blockchain Congress was a great come back experience after the pandemic. The number of attendees and especially the number of one to one meetings was fruitful. The TDeFi team was also there to handhold at every stage.

Waqas Nakhwa, Aqar Chain - Co-Founder & CTO

We found the organization to be brilliant! The team was very accessible, the event was very well organized and we will be very happy to participate in the next conventions organized by Agora.

Sami Chlagou, Cross the Ages - CEO

I want to thank Agora Group for a great conference! The facilities were great & we got to meet some great teams and interesting people. Overall a good layout for the conference.

Mattias Borg, Qtum Foundation - Business Development Manager

My overall feedback is very positive. The quality of projects and people was definitely higher than at some other conferences. The panel discussions were focused and one-on-one meetings were great. Organization was done very well.

Vadim Khramov, Edge Capital Management - Founder & CIO

The 7th edition of the Global Blockchain Congress enabled us to interact with creative and brilliant minds from the crypto space. The overall experience was great and we would be happy to participate every year!

Mikita Gagalani, NewTribe Capital - Analyst

Thank you, Agora Group Team! The 7th Edition of the Global Blockchain Congress has been a complete success! We are very proud of the results and to have been the Title Sponsor of the event - congratulations to all the team and participants! See you soon!

Woonkly Team

TESTIMONIALS

The Global Blockchain Congress in Dubai is one of the most exclusive events for innovators, startups and investors, bringing people together. It was really a fantastic experience for me and for DRIFE. I participated in this event for the second time and I could feel the energy and the excitement in the room.

Firdosh Sheikh, Drife - *CEO & Co-Founder*

As expected, Hadi, Rim and the entire Agora Team delivered a superb event. The event was professionally executed – Superb planning and great investors.

They managed to deliver on their promise: Showcasing talented Blockchain based entrepreneurs and their crypto business solutions to savvy and seasoned investors.

g.a. mercado, estudios amazonia - *Director*

I really was super impressed with the organisation of Agora's 7th edition Global Blockchain Congress. Everything was meticulously planned and the team ensured that as investors we had our time allocated well.

I will definitely attend future events organised by Agora.

Kunal Savjani, Shorooq Partners - *Managing Director*

We want to thank Agora Group for the great organization of the 7th Edition of the Global Blockchain Congress in Dubai 2021! CRIPTOVISION was presented to potential investors with a great chance!

We will now move on the next step to start global commercial operations of our 6 business lines!

Nelson Cabrera, Criptovision - *CEO & Founder*

Agora is a great initiative to bridge the gap between investors and projects. The team is very efficient in organizing the event, bringing quality content, & quality speakers. Kudos to the team for pulling off another successful event!

Shantnoo Saxsena, Mass DeFi - *Chief Operating Officer*

Agora's conference is one of the best conferences I ever visited as I was amazed by the way they presented us with investment opportunities and sent us our one to one schedule in advance. Very high profile speakers and topics were well selected. Networking opportunities were also great and valuable in building partnerships for the future.

Ahmed Ali Mousa Alnaqbi, Ali Mousa Holding Group - *Group CEO*

TESTIMONIALS

Thank you very much for hosting such an amazing Congress! Safe Haven was extremely pleased with the networking opportunities provided by Agora at the Global Blockchain Congress in Dubai - communication was clear, smooth, and concise. Our primary goal was to increase awareness about the importance of decentralized inheritance and personal backup plans, via Inheriti, which was facilitated well with the guidance and assistance of Agora's organization skills. Many angel investor and venture capitalist meetings were hand-picked by Agora to match sought services and blockchain technology that we provide. Accommodations pertaining to lodging/catering was above expectations and all levels of comfort were taken into consideration. We strongly recommend other blockchain projects to attend congresses held by Agora in the future.

Tyler Doussan, Inheriti - Head of Community Growth

This year's Global Blockchain Congress by Agora Group was yet another great success, with the quality of the speakers line-up and the caliber of the blockchain community under one roof. We have been attending the Agora events for a few years now and the consistency and development of the events is truly inspiring. It was a no brainer for us to work hand in hand with Hadi and Reem to combine our forces and offer the participating companies a strategic partnership to further their reach into this region. Kudos to the Agora team to being so passionate in their work and bringing us events that create great opportunities to all involved.

Mohamed Al Banna, HH Sheikh Juma Al Maktoum - Senior Advisor

The 7th Edition of the Global Blockchain Congress exceeded our expectations and I am glad to have been a delegate at the event. I have attended many industry events but I can't boast that any met the standard of this Congress.

From the presentations, fire-side chats, networking opportunities to the social events, everything was well planned. What amazes me the most is that no delegate was left behind as we all felt that sense of belonging.

If the future of blockchain is to be exactly how we have all imagined it, a decentralized world where systems work, this event needs to bring all industry players together periodically. Can't wait for the next event!

Constantin Ene, Vanilla Network - CTO

As an early stage startup, Agora's model of connecting great projects directly with a fantastic set of investors in a tightly held event and over one-on-one meetings is very unique and extremely rewarding. The feedback, interests and partnership that are possible because of this format of engagement, makes it unique and trust-worthy. Not only is Agora able to bring together the comprehensive set of investors and ventures together, but they are hands on when it comes to making sure and mutually productive event for investors and startups alike.

Harishkarthik Gunalan, Coin Fantasy - Co-Founder

TESTIMONIALS

On behalf of the Goldfinger team, we would like to thank you for hosting and organizing this 7th edition of the Global Blockchain Congress. It has been a pleasure for us to present and attend your sharp gathering. We have appreciated the networking opportunities which were well organized, we might have been able to secure some funding. A fantastic outcome of the conversations and relationships made.

We believe that Agora is a well-established middleman, future oriented and ready to make a change. We recognize the fact that Agora can be a network booster as well as a business development facilitator. We overall very much enjoyed our experience and will be coming back for more.

Goldfinger Team

It is indeed amusing to witness the level of access and exposure to great opportunities, the Agora Group guarantees to yet a nascent markets like DeFi and NFTs. Attending the 7th Global Blockchain Congress organized by Agora was an affirmation of how bridging value truly is.

Khalid Al Mahfouz, Ascend E-Ventures - Business Dev. Director

Firstly congratulations on conducting a very successful event during these times. I believe it was a refreshing change for everyone and we had the opportunity to meet with a lot of interesting people and ideas during this conference.

For me, it was my first Blockchain event, and it was a great opportunity to learn about the latest developments and meet with different people from across the globe to share ideas and concepts.

Thank you once again for the invitation and looking forward to attending your upcoming conferences.
